

Condemned / Rejected Cylinder Notification

Having followed the required procedures outlined in 49 CFR 180.205 & 180.209 for visually inspecting propane cylinders, it has been determined that your cylinder does not meet the necessary parameters for requalification.

Therefore, according to 49 CFR 180.205 we hereby inform you that your cylinder has been condemned/rejected for requalification. Being that the cylinder has been condemned it may not be filled with hazardous material and offered for transportation in commerce where use of a specification packaging is required.
