

Nee-vo Tank Monitors Setup

Helpful Steps to Guide You Through The Process

1

Search Monitor Serial Number in the "Find a tank monitor" bar.

****Make sure the route is set to your branch**

2

- Be sure the search field is set by what you're searching for.
- Make sure to click the highlighted serial number.

3

You are on the correct path if this pop up screen appears. Then Click the Edit Button.

4

This is where you will add your tank/customer info.

- If the customer decides they would like to be notified, make sure to click "Alert Profile" Default is 30%.
- Be sure to click the "Installed" toggle switch.
- The customer info is the same as in Cargas.

5

Here you will fill in the information for the tank.

****Don't Forget the Serial Number**

Then proceed to click "Send". A box will pop up where you will enter the customer or driver's email.

6

Most importantly, when you are finished, scroll down to the bottom of the page and click "SAVE"

If you have any questions, please don't hesitate to reach out.
